Jun 10 2015 09:57 HP Fax 573-929-3949 page 1

RESOLUTION NO. 09-2015

A RESOLUTION OF INTENT TO PARTICIPATE IN NATURAL HAZARD MITIGATION AND TO WORK TOWARD BECOMING A SAFER COMMUNITY.

WHEREAS, the City of Bellflower recognizes that no community is immune from natural hazards whether it be tornado/severe thunderstorm, flood, severe winter weather, drought, heat wave, earthquake, dam failure or wildfire and recognizes the importance enhancing its ability to withstand natural hazards as well as the importance of reducing the human suffering, property damage, interruption of public services and economic losses caused by those hazards; and

WHEREAS, the City of Bellflower may have previously pursued measures such as building codes, fire codes, floodplain management regulations, zoning ordinances, and storm water management regulations to minimize the impact of natural hazards; and

WHEREAS, the Federal Emergency Management Agency and the State Emergency Management Agency have developed a natural hazard mitigation program that assists communities in their efforts to become Disaster-Resistant Communities which are sustainable communities after a natural disaster that focus, not just on disaster relief, but also on recovery and reconstruction that brings the community to at least pre-disaster conditions in an accelerated, orderly and preplanned manner; and

WHEREAS, by participating in the Natural Hazard Mitigation program, the City of Bellflower will be eligible to apply for post-disaster mitigation funds; and

WHEREAS, the City of Bellflower desires to commit to working with government partners and community partners to implement the Natural Hazard Mitigation Plan; and

WHEREAS, the City of Bellflower will implement pertinent precepts of the mitigation plan by incorporation into other community plans and mechanisms where appropriate; and

WHEREAS, the City of Bellflower will participate in the evaluation and review of the Plan after a disaster as well as complete a mandated five-year update submitted to the State Emergency Management Agency and the Federal Emergency Management Agency for review and approval; and

NOW, THEREFORE BE IT RESOLVED by the City of Bellflower as follows:

The City of Bellflower hereby adopts the Montgomery County Multi-Jurisdictional Natural Hazards Mitigation Plan attached hereto for the purpose of building a safer community by reducing natural hazard vulnerability.

ADOPTED this 9th day of June, 2015.

RE: Montgomery County Hazard Mitigation Plan Update

Greetings,

The Missouri State Emergency Management Agency has contracted with Boonslick Regional Planning Commission (BRPC) to update the Natural Hazard Mitigation Plan for Montgomery County including all incorporated municipalities and school districts within the county. The purpose of this plan is to reduce or eliminate long term risk to the people and property of the County from the effects of natural hazard events. This approach will ensure that our local governments remain eligible for all disaster recovery assistance possible.

BRPC will facilitate the planning process, collect the necessary data, and perform other technical services, including preparing risk assessment and plan documents. However, BRPC will need your help to successfully complete this project.

The hazard mitigation planning process is heavily dependent on the participation of representatives from local government agencies and departments, the public, and other stakeholder groups. A Hazard Mitigation Planning Committee will be formed to support this project and will include representatives from the county, communities, school districts, and other agencies in or that serve Montgomery County.

To remain eligible for future hazard mitigation funds all city and county government and school districts **MUST** participate in the planning process and formally adopt the plan upon its completion. Your organization's participation on the committee is requested due to your ability to contribute needed information, technical knowledge, or other valuable experience to the plan.

If you cannot participate, please designate a representative to serve on the committee and attend the kickoff meeting, which will discuss the benefits of developing a hazard mitigation plan, the project schedule and the hazards that affect Montgomery County. The length and number of meetings will be kept to a minimum to respect your time commitments.

Montgomery County Updated Hazard Mitigation Plan Kickoff Meeting

September 16, 2014; 6:30pm – 8:00pm
Montgomery County Ambulance Station
603 Stoddard Memorial Drive, New Florence, MO

Please respond with the name and contact information of the person who will attend the kickoff meeting on behalf of your community by contacting Mark Cunningham via telephone (636) 456-3473 or via e-mail at mcunningham@boonslick.org.

Sincerely,

Bob Bishop

Bob Bishop, Director

Hazard Mitigation Update Planning

The Montgomery County Emergency Management Agency, in association with the Boonslick Regional Planning Commission is beginning the process of updating the county's Natural Hazard Mitigation Plan. The purpose of the plan is to reduce or eliminate long term risk to the people and property of the county from the effects of natural hazard events. This approach will ensure that the county's local governments remain eligible for all possible disaster recovery assistance.

A Hazard Mitigation Planning Committee kick-off meeting will be held at the Montgomery County Ambulance Station, 603 Stoddard Memorial Drive, New Florence, at 6:30 p.m. on September 16th.

All incorporated municipalities and school districts within the county must participate in the planning process and legally adopt the updated plan. The general public is invited as well

Boonslick Regional Planning Commission

Montgomery County Hazard Mitigation Planning Update - Meeting 1

September 16, 2014; 6:30pm
Montgomery County Ambulance Station
603 Stoddard Memorial Drive
New Florence, MO

The meeting was called to order at 6:30 by Krishna Kunapareddy of the Boonslick Regional Planning Commission (BRPC). Seventeen Montgomery County residents were present plus Ms. Kunapareddy and Mark Cunningham, also of BRPC. A sign-in sheet is part of this meeting package. A round table introduction took place.

Krishna reviewed the meeting tasks, then turned the floor over to Bob Bishop, Montgomery County Emergency Management Director, who re-acquainted the audience with the ways in which FEMA has helped the county during past disasters. The PowerPoint presentation used is part of this meeting package.

Following Bob's presentation, Krishna explained the update process that will be used at the meeting, then introduced the team to the Vulnerability Assessment charts. A great deal of conversation followed, resulting in a significant number of changes from the past assessment. The team made the following updates to the chart which is part of this meeting package:

Countywide Natural Hazards Ranking

- Drought Probability was lowered to Moderate, Severity raised to Moderate
- Hail Severity was raised to Moderate
- Wild Fire probability, Severity, and Vulnerability were all three raised to Moderate
- Winter Weather Severity was raised to Moderate

Jurisdiction Specific Natural Hazards Ranking

- It was agreed that Middletown is at High Severity due to dam failure while the remainder of the county remains at low Probability and Severity. Therefore, it was agreed to add a line item under Dams specifically for Middletown. It's Probability is Low, the Severity is High, and the Vulnerability Ranking is Low.
- For Floods and Flash Floods, the Gasconade District needs to be added as a school district and the Wellsville/Middletown district should be added as a slashed name.

Man Made Hazards

- The Severity of Terrorism was increased to High to account for an active shooter.
- Transportation Disruption was increased across the board to High.

Goals, Objectives, and Action Plans

Following completion of the Vulnerability charts attention was turned to review of the Goals, Objectives, and Action Plans from the current mitigation plan. These plans were already reviewed by Bob Bishop and the Montgomery County Commissioners. The review prompted many questions which were fielded by Bob in his capacity as EMD. While the discussion that ensued was good, it resulted in just a few cosmetic changes to the document. Bob was asked to check 1.1 paragraph 2 to make sure the city capabilities were correct. In 1.2, paragraph 1, Middletown will be added to the jurisdictions and under Status, Planning and Zoning will be changed to Flood Plain Ordinance. In 1.3, paragraph 5, school districts will be added to the status to indicate that earthquake drills are held annually and included in the districts Emergency Preparedness plans. The team asked for clarification of 1.5, paragraph 1 to make the connection between the use of "existing mechanisms" and how it relates to the "County administering the flood plan management program..." For 1.7, paragraph 1, the Health Department will be added as an organizer and will be charged with creating a database of disadvantaged people. It was explained that this information is difficult to collect and will likely yield poor results. It was also agreed that Dan Cole's name will be associated with the Senate Bill 40 Administrator position which is be listed first under the Lead Organizer Column. For 3.1, paragraph 3, it was requested that Bob Bishop make an effort to obtain an emergency plan for the dam impacting Middletown. This document is part of the meeting package.

Throughout the conversation, many asked about the acronyms and were told that the complete plan will include and appendix with a definition of all acronyms.

The meeting was adjourned at approximately 8:15pm.

Next Meeting
